

ALH/ school locker room cabinets

## ***ALH locker room cabinets***

**ALH** school locker room cabinets system is a clever, environment friendly solution designed for educational institutions. Various elements of your choice are placed on vertical steel rails which are mounted directly to the wall or arranged as free-standing units.

### *Easy and practical*

This complete system includes hanger strips, shelves, shoe shelves and comfortable seats. All these elements can be easily attached to our rail system in various combinations.

### *Safety and aesthetics*

To ensure safety of the children we eliminated sharp edges. Moreover, school furniture do not have to be boring. ALH steel elements are available in a range of bright RAL colors. Sitting benches and other elements are covered in very durable HPL laminates or veneers.

### *Combinations*

We offer hanging units for 2 or 3 children or free standing both-sides units for 4 or 6 children.

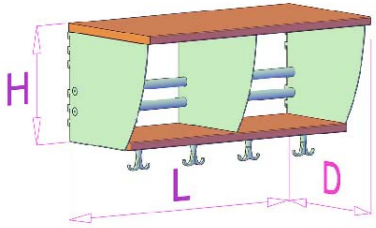

## LOCKER ROOM CABINETS

- Support elements in form of 30mm wide, wall-mounted, perforated steel rails or free-standing assembled frames with vertical steel rails attached.
- All steel elements of cabinets are made of 2 mm steel.
- Shoe shelves are constructed of Ø20 mm steel pipes.
- Steel elements are powder coated (\*for available colors see page 8).

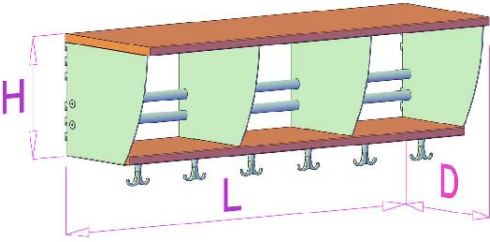

- Shelves, benches, clothes hanger strips are made of 18mm chipboard. Edges are covered with 4mm solid wood strip or 2mm ABS. The surface is covered with HPL laminate or veneer (\*for available colors see p.9).
- Free-standing frames are leveled with adjustable feet and then mounted to the floor with screw-dowels.
